Central Dauphin

Memo

Scott Kuren Director of Pupil Services

TO: **Parents/guardians of students with a Severe Peanut Allergy**

FROM: Scott Kuren SK

RE: **FDA Warning**

DATE: 3/10/15

Parents/guardians,

This is strictly an informational memo. We have received information from the FDA, U.S. Food and Drug Administration, and feel this information was necessary to share with our families of students with severe peanut allergies.

The FDA has issued a warning that some ground cumin containing products may also contain undeclared peanuts

Last week, the FDA issued a warning for people highly allergic to peanuts to consider avoiding foods containing ground cumin/cumin powder, as some of these products have been found to contain undeclared peanuts. The below website to the FDA contains a list of recalled foods that have been found to contain undeclared peanuts. Information has been distributed to our nursing staff and our cafeteria vendor Nutrition Inc. If you would like additional information please see the weblink below.
